Engine: **3.5 PFDI**	Drive Type: **Rear Wheel**	Cylinder Config: **V-6**

FORD TRANSIT 148 WB

Medium Roof | Extended Length | Rear or Side Lift

20%-46% better fuel economy than previous E-Series vans

EPA Estimated 15 city & 19 highway

1 to 3 wheelchair occupants & up to 9 passengers

Spacious, comfortable, powerful, and fuel-efficient, the Ford Transit is a mainstay amongst NEMT providers, community homes, and hospitals across the nation. The Ford Transit with the Long Wheelbase measures in at 148 inches between wheels and has varying options for roof heights and cab lengths. As for the largest of these offerings, the Ford Transit Long-Extended Length, spans 263.9 inches and offers 100.5 cubic feet of cargo space behind the last row of stock seating. The Ford Transit Long-EL offers the most seating customization of all the vehicles in our lineup. The new 3.5 PFDi (Port Fuel and Direct Injection) V6 Engine cranks out approximately 275 HP and is smaller and more fuel efficient than previous engines. The Ford engine comes mated to a new, seamless 10-speed automatic transmission, replacing the previous generation's 6-speed automatic for added fuel efficiency in every road condition. All the amenities you need to keep your passengers comfortable come equipped— A/C, heater, power doors/locks, dome lamps with theater dimming, Bluetooth audio system with USB input jacks, rear view camera, and a multi-function display, to name a small few. Along with our fully ADA and CARB-compliant wheelchair conversions expertly engineered right here in Southern California, the Transit comes standard with Pre-Collision Assist Automatic Emergency Braking, Post-Collision Braking, Back-up Alarms, and FMVSS 226 Compliant Glass. Our Ford Transit 148 WB is the ultimate solution for fleets and providers looking to maximize their passenger shuttling capacity without compromising on performance and value.
